Architecture

MVP, Redux, MVVM, Clean, SOLID

Integrations

Firebase Cloud Messaging, Locations API, SocketIO, REST/RPC API

Unit/UI testing

JUnit, Mockk, Mockito, Robolectric, JaCoCo

iOS

Swift, UIKit, AutoLayout, Stevia

Work Experience

WiseHouse

Android Developer

Mar 2020 - nowadays

Created MyIGB app from scratch to Google Play publication

Build an architecture based on MVP+Redux supporting offline mode

Setup CI with automatic builds sent to Telegram and Google Play

Wrote code 100% on Kotlin using modern libs: Coroutines, Flow, Ktor

Attendify

Android/iOS Developer

Jan 2018 - Mar 2020

Created number of features in 2 key projects both on Android and iOS

Setup CI with daily builds sent to Slack channel

Started codebase migration to Kotlin

Deeply collaborate with designers to implement user-friendly UI

May 2017 - Aug 2017

Together with PM, we built a development process
Setup CI with automatic deployment to Fabric Beta
Conducted interviews for hiring an Android developer

Feb 2016 - Aug 2017

Implement features for the mobile localization SDK
Increased code coverage with unit tests to 60+ %
Setup Github as Maven repo for the SDK artifacts
Wrote usage docs for the SDK

Jul 2015 - Jan 2016

Created an unusual UX to search for the flight tickets and hotels all over the world

Aug 2013 - Dec 2014

Ensured regular bug-free releases of the product with 1M+ users
Mentor a team of 2 developers, made a code review, collaborated with PM
Develop and support shared codebase for 3 ivi projects

Jan 2012 - Sep 2012

Created an analogue of Android Layout Inflater for the custom UI framework

Education

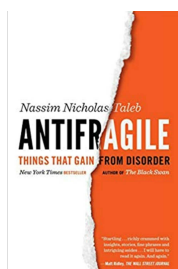

Applied Mathematics, Cybernetics
KNU Taras Shevchenko 2007–2012
